PROJECTS

1. Number Guessing Game

In this game the computer proposes a secret number. Player tries to guess a number. Computer tells, if guess is right or smaller/greater than the secret number.

2. Tic Tac Toe Game

I use a 2D array, board to maintain the board cells in this array store values that indicate if that cell is empty or stores an X or 0

3. Flappy Bird Game in Java

In this whole project I uses java and some swing component to make it look astonishing.

4. Employee Attendance Management System

This system manages the present and absent records of the employees working in an organization.
